YJK ERP DOCUMENTATION

1. Introduction :

1.1 Purpose

• The document provides an overview of the ERP project, detailing the screens used and their functionalities. It explains each screen's specific purpose and how they contribute to the overall system. The aim is to give a clear, concise understanding of the ERP's structure and features.

1.2 Scope

- The document covers the core ERP screens and their functionalities, detailing how they enhance business processes.
- It focuses on explaining the system's usability and integration to improve operational efficiency.

2. Business Objectives :

- **Streamline Operations:** To enhance efficiency by outlining the key ERP screens and their functionalities, enabling smoother business processes.
- **Improve Usability:** To provide a detailed explanation of each screen, ensuring users understand how to navigate and utilize the system effectively.
- **Facilitate Decision-Making:** To offer a clear overview of the ERP project, supporting informed decisions regarding system improvements and optimizations.
- **Enhance System Integration:** To demonstrate how various ERP modules interact, ensuring cohesive and integrated business operations across departments.

3. Management:

- **Integrated Workflow Automation:** ERP management should streamline and automate business processes across departments, improving efficiency and reducing manual errors.
- **Real-Time Data Analytics:** The system must provide real-time analytics and reporting, enabling informed decision-making based on up-to-date information across all business functions.

ERP Management System				
Sl. No	Admin	Master	Transactions	Report
1	Company	Attribute	Purchase	Asset Inventory Report
2	Locations	Numbering Series	Purchase Return	Asset Purchase Report
3	User	Item	Sales	Employee Asset Assignment Report
4	Role	Warehouse	Sales Return	Accounting Centre Allocation Report
5	Company - Mapping	Vendor	Issue	Location-Based Asset Report
6	Role - Mapping	Customer	Receipt	Historical Asset Changes Report
7	Role Rights	Bank	Return	Software Licenses
8	Divisions	Employees	Asset Allocation	Consumables

11	NON	Designation	File Import	NON
12	NON	License	NON	NON
13	NON	Accessory	NON	NON
14	NON	Consumable	NON	NON
15	NON	Component	NON	NON

- The reference image represents the home page, where users can log in by clicking the "Login" button.

5. Sign-In :

- Users can sign in to the screen by entering the **correct User code & password**.

- If a user forgets their password, they can reset it by clicking on "**Forgot Password.**"
- After entering their registered **email ID**, an **OTP** will be sent to that email. By entering the OTP, users can then Recreate a **new password**.

After Login

6.List of Companies :

- You can select the company you have permission to access, then click the "**Save**" button.
- Once you receive a **success notification**, you will be directed to the **main screen**.

S.No	Company Code	Company Name	Location code	Location Name
1	AKPON007	YJK Tech	12	ponneri
2	YJK TECHNOLOGIES P	YJK TECHNOLOGIES PRIVATE LIMITED	001	tidel park warehouse

7.Sidebar :

- The sidebar displays the **names of all available screens**, helping you easily find and access the screen you want to use.

8. Dashboard :

- The dashboard provides a **comprehensive overview**, allowing users to monitor key metrics, access important data, and navigate to various sections of the application efficiently.

- The Reference image of the dashboard have been attached above.

8.1 Total Sales :

- The sales analysis screen allows users to view overall sales performance over a specified period. Users can select a predefined period from a dropdown menu or manually enter custom dates to examine sales data. This flexibility enables detailed insights into sales trends and patterns. The information helps businesses make informed decisions based on sales performance.

- Once the specific period has been selected from the dropdown the data will be displayed in the grid were the reference image as been attached below

Sales Analysis

✦ **Print Button**- Used to print the data in a A4 sheet format

✦ **Chart Button** – The chart button gives the data in chart format

✦ We can select the chart type by choosing the appropriate choice from the drop down it also have period range to view the respective data in a chart flow

✦ **Close Button**- The close button is used to close the Purchase analysis screen.

8.3 Total Items :

🔹 The Total Item Dashboard provides an overview of all item data, including purchases, sales, purchase returns, and sales returns. It offers a clear snapshot of item movement across these categories, helping you track inventory performance. With detailed insights, you can monitor trends and make informed decisions about stock levels and transactions.

The screenshot shows the 'Total Items' dashboard. On the left is a search bar and a list of items. The main area displays details for 'price10', including 'Sale Price: 300', 'Purchase Price: 230', 'Stock qty: 22', and 'Stock Value: 5060'. Below this is a table of transactions.

Transaction Date	Transaction No	Item Name	Vendor/Customer Code	Vendor/Customer	Quantity
2024-09-12	SMHF/213/2024-2025	ponni rice	HK09	HARISH	18
2024-09-12	SMHF/215/2024-2025	ponni rice	SA	SARASS	4

• The Total Item Dashboard allows users to select any item they want to analyze. By choosing an item, they can view detailed data on its purchases, sales, and returns. This feature provides a clear and focused view of individual item performance.

• The user can see the specific data of the item by filtering it in Entering party code or by selecting the date range and also selecting the data type weather he want to view

• Users can filter item data by entering a party code, selecting a date range, and choosing the data type they want to view. This gives them flexibility to see specific details based on their criteria, making it easier to analyze targeted information.

The screenshot shows a dashboard with filters: 'Enter Party Code...' (search), 'From' (dd-mm-yyyy), 'To' (dd-mm-yyyy), and a dropdown menu set to 'All'. The dropdown menu is open, showing options: 'All', 'Purchase', 'Purchase Return', 'Sales', and 'Sales Return'. Below the filters is a table with columns: Transaction Date, Transaction No, Item Name, Vendor/Customer, and Quantity.

Transaction Date	Transaction No	Item Name	Vendor/Customer	Quantity
2024-09-12	SMHF/213/2024-2025	ponni rice	HK09	18
2024-09-12	SMHF/215/2024-2025	ponni rice	SA	4

• It has two buttons

✦ **Chart Button**-This button is used to see the data in the chart view

8.5 Sales Value :

The sales value chart gives an overview of total sales. Users can select the chart type and choose a date range to view the data. This helps in quickly analyzing sales performance over time.

• The Reference image as been attached below

8.6 Item –Wise Sales :

• The **Item-Wise Sales** feature provides a detailed view of sales performance for individual items. It shows how many units of each item have been sold over a selected time period, helping users track the sales trends of specific products. This breakdown allows businesses to analyze which items are performing well and make informed decisions on inventory management, promotions, and restocking. Filters for date range and categories may be available for a more tailored analysis.

• The Reference image as been attached below

8.7 Purchase Value :

• The **Purchase Value** feature provides an overview of the total cost of items purchased within a selected time frame. Users can also select the chart view that best suits their preferences for analyzing the data. This helps track inventory spending and assess purchasing patterns more effectively.

• The Reference image as been attached below

8.8 Warehouse Stock :

• The **Warehouse Stock** feature provides an overview of the current inventory levels across different warehouses. Users can track stock quantities for each item and warehouse location in real time. This helps in managing stock distribution and ensuring optimal inventory levels.

• The Reference image as been attached below

8.9 Current Stock:

• The **Current Stock** feature displays the real-time inventory levels of all items in the system. It provides an up-to-date view of stock availability, helping users manage inventory efficiently. This ensures accurate monitoring of stock for sales, purchases, and replenishment decisions.

• The Reference image as been attached below

9. Negative Stock:

• The **Negative Stock** feature highlights items that have fallen below zero inventory levels, indicating a stock deficit. This alerts users to potential issues with inventory management and the need for immediate action, such as restocking or adjusting sales practices. Monitoring negative stock helps prevent disruptions in operations and ensures better inventory control.

• The Reference image as been attached below

- After clicking "Location" from the sidebar, this screen will appear.
- You can search for data using the provided **search criteria**. If you enter a valid data, the results will be **displayed in a grid**.
- If you search for data that doesn't exist, a notification will appear stating "**Data not found**". You can **refresh** the screen to search again.
- If you want to **display all data**, simply click the "**Search**" button without entering any data, and all records will be shown.

Tooltips and Buttons :

- In the corner, you'll find four buttons with tooltips that explain their functions.

- Add
- Delete
- Update
- Generate Report

Add Location :

- Here, you can **add any location** you want. After entering the details, click the "**Save**" button.
- You can close the window using the "**Close**" button, or navigate back using the "**Back**" button.

- After saving, the data will appear in the grid.

Delete Location :

- To delete any data, select the specific row and click the **"Delete"** button.
- A prompt will ask, **"Are you sure you want to delete this row?"**
- If you click **"Yes,"** the data will be successfully deleted
- And a notification will appear saying **"Row deleted successfully"**

- If the data is linked to another record, it cannot be deleted, and a notification will appear stating, **"Location cannot be deleted due to a link with another record."**

Update :

- If you want to change any data, modify it and click the "Update" button.
- A prompt will ask, "Are you sure you want to update the data in the selected rows?"
- After clicking "Yes," the data will be successfully updated.
- And a notification will appear saying "Data updated successfully."
- The old data will be replaced by the new data.

Generate Report :

- To generate a report, click the "Generate Report" button to retrieve the information.

Company :

- After clicking "**Company**" from the sidebar, this screen will appear.
- You can search for data using the provided **search criteria**. If you enter valid data, the results will be **displayed in a grid**.
- If you search for data that doesn't exist, a notification will appear stating "**Data not found**". You can refresh the screen to search again.
- If you want to display all data, simply click the "**Search**" button without entering any data, and all records will be shown.

The screenshot shows the 'Company' search interface. It features a search bar with fields for Company No, Company Name, City, State, Pin Code, Country, and Status. A 'Search' button (magnifying glass icon) is highlighted with a red box. Below the search bar is a 'Result Set' table with columns: Code, Name, Short Name, Address 1, Address 2, Address 3, City, State, Pin Code, and Country. The table contains 10 rows of data. At the bottom right, it shows '1 to 8 of 57' and 'Page 1 of 8'.

Add Company :

- Here, you can add any company you want. After entering the details, click the "**Save**" button.
- You can close the window using the "**Close**" button or navigate back using the "**Back**" button.
- After saving, the data will appear in the grid.

The screenshot shows the 'Add Company' form. It includes fields for Company Code, Company Name, Short Name, Address 1, Address 2, Address 3, City, State, Pin Code, Country, Email, Status, Founded Date, Website URL, Contact No, and Annual Report URL. A 'Location No' dropdown menu is open, showing a list of location numbers: 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

- Here, you can select the **saved location number** from the "**Location No**" dropdown menu.

Delete Company :

- To delete any data, select the specific row and click the "**Delete**" button.

- A prompt will ask, "**Are you sure you want to delete this row?**"
- If you click "**Yes**," the data will be successfully deleted.
- A notification will appear saying "**Row deleted successfully**"
- If the data is linked to another record, it cannot be deleted, and a notification will appear stating, "**Company cannot be deleted due to a link with another record.**"

Update :

- If you want to change any data, modify it and click the "**Update**" button.
- A prompt will ask, "**Are you sure you want to update the data in the selected rows?**"
- After clicking "**Yes**," the data will be successfully updated.
- A notification will appear saying "**Data updated successfully**".
- The old data will be replaced by the new data.

Generate Report :

- To generate a report, click the "**Generate Report**" button to retrieve the information.

Role:

- After clicking "**Role**" from the sidebar, this screen will appear.
- You can search for data using the provided search criteria. If you enter valid data, the results will be displayed in a grid.
- If you search for data that doesn't exist, a notification will appear stating "**Data not found.**" You can refresh the screen to search again.
- If you want to display all data, simply click the "**Search**" button without entering any data, and all records will be shown.

Generate Report :

- To generate a report, click the "Generate Report" button to retrieve the information.

User and Company Mapping:

• This section allows you to map which users are permitted to access specific companies. After clicking "**User and Company Mapping**" from the sidebar, the following screen will appear.

User Code	Company Code	Location No	Status	Order No
ak97	ak	001	ACTIVE	4
ak97	AKPON07	12	CLOSE	5
ak97	c	99	active	4
AP90	AKPON078787	12	ACTIVE	4
JK	AKPON007	12	ACTIVE	0
JK	AKPON078887	12	CLOSE	4
KA	dhlp2612	CH	Active	7
ka	U6205T29	CH	Active	1
KA	U6205TN9	CH	Active	2
KA	YJK05	mu	Active	3

• You can search for existing mappings using the provided search criteria. If you enter valid data, the results will be displayed in a grid.

• If you search for mappings that don't exist, a notification will appear stating "**Data not found.**" You can refresh the screen to search again.

• To display all existing mappings, simply click the "**Search**" button without entering any data, and all records will be shown.

Add User and Company Mapping :

- Here, you can create a mapping between a user and a company using the dropdown menus, based on the data you've already entered for users and companies. After entering the details, click the "**Save**" button

- You can close the window using the "**Close**" button or navigate back using the "**Back**" button.
- After saving, the mapping will appear in the grid.

Delete User and Company Mapping :

- To delete a mapping, select the specific row and click the "**Delete**" button.
- A prompt will ask, "**Are you sure you want to delete this row?**"
- If you click "**Yes**," the mapping will be successfully deleted.
- A notification will appear saying "**Row deleted successfully.**"
- If the mapping is linked to another record or is required for system integrity, it cannot be deleted, and a notification will appear stating, "**Mapping cannot be deleted due to a link with another record.**"

User Code	Company Code	Location No	Status	Order No

Generate Report :

- To generate a report on user and company mappings, click the **"Generate Report"** button to retrieve the information.

User and Role Mapping:

🔗 This section allows you to assign specific roles to users, defining what permissions and capabilities they have within the system. After clicking "**User and Role Mapping**" from the sidebar, the following screen will appear.

The screenshot shows the "Role Mapping" interface. At the top, there's a header with the title "Role Mapping" and four icons: a green plus icon, a red minus icon, a blue square icon, and a blue circle icon. Below the header is a "Search Criteria" section with four input fields: "User Code", "User Name", "Role ID", and "Role Name". Below these fields are two buttons: a "Search" button (a blue circle with a magnifying glass icon) and a "Refresh" button (a blue circle with a circular arrow icon). The "Search" button is highlighted with a red box. Below the search criteria is a "Result Set" section containing a table with four columns: "User Code", "User Name", "Role ID", and "Role Name". The table has four rows of data.

User Code	User Name	Role ID	Role Name
hk09	Harish	ad	admin
jk	JaiKrishnan	ad	admin
lohiitha	LK	ad	admin
Test	Test	ad	admin

🔗 You can search for existing mappings using the provided search criteria. If you enter valid data, the results will be displayed in a grid.

🔗 If you search for mappings that don't exist, a notification will appear stating "**Data not found.**" You can refresh the screen to search again.

🔗 To display all existing mappings, simply click the "**Search**" button without entering any data, and all records will be shown.

Add User and Role Mapping :

🔗 Here, you can assign a role to a user by creating a new mapping using the dropdown menus based on the data already entered for role and user. After entering the details, click the "**Save**" button.

• You can close the window using the "**Close**" button or navigate back using the "**Back**" button.

• After saving, the mapping will appear in the grid.

Delete User and Role Mapping :

• To delete a mapping, select the specific row and click the "**Delete**" button.

• A prompt will ask, "**Are you sure you want to delete this row?**"

• If you click "**Yes**" the mapping will be successfully deleted.

• A notification will appear saying "**Row deleted successfully**"

• If the mapping is linked to another record or is required for system integrity, it cannot be deleted, and a notification will appear stating, "**Mapping cannot be deleted due to a link with another record.**"

Update User and Role Mapping :

• Here, the update process is different. If you want to change the mapping, you need to enter the existing data again, and it will be automatically updated.

Generate Report:

🔗 To generate a report on user and role mappings, click the "**Generate Report**" button to retrieve the information.

Divisions :

Description:

In asset management, divisions refer to the various departments or units within an organization to which assets are allocated. Each asset is assigned to a specific division, and this allocation is tracked in the system. To save and view this data, a record is created linking each asset with its respective division, allowing for easy retrieval of which assets belong to which division. This ensures efficient management and reporting of asset distribution across divisions.

Zones:

Description:

Zones refer to specific areas within a larger region that are categorized based on particular functions, regulations, or characteristics. These divisions help organize and manage space for various purposes. Common types of zones include:

1. **Residential Zones** – Areas designated for housing and living spaces.
2. **Commercial Zones** – Spaces allocated for businesses, shops, and offices.
3. **Industrial Zones** – Regions set aside for manufacturing and industrial activities

Role Rights:

🔗 This section allows you to assign specific rights to users, defining what rights and capabilities they have within the system. After clicking "Role Rights" from the sidebar, the following screen will appear.

• You can search for existing rights using the provided search criteria. If you enter valid data, the results will be displayed in a grid.

• If you search for rights data that doesn't exist, a notification will appear stating "**Data not found.**" You can refresh the screen to search again.

• To display all existing rights data, simply click the "**Search**" button without entering any data, and all records will be shown.

Add Role Rights :

• Here, you can assign a role ID to a user by creating a new permission type using the dropdown menus based on the data already entered for role and user. After entering the details, click the "**Save**" button.

• You can close the window using the "**Close**" button or navigate back using the "**Back**" button.

• After saving, the rights data will appear in the grid.

Delete Role Rights :

- To delete a rights , select the specific row and click the "**Delete**" button.
- A prompt will ask, "**Are you sure you want to delete this row?**"
- If you click "**Yes**" the rights will be successfully deleted.
- A notification will appear saying "**Row deleted successfully**"
- If the rights is linked to another record or is required for system integrity, it cannot be deleted, and a notification will appear stating, "**Role Rights cannot be deleted due to a link with another record.**"

The screenshot shows the 'Role Rights' management interface. At the top, there are three input fields: 'Role Id', 'Screen Type', and 'Permission Type', each followed by a search icon. Below these fields is a 'Result Set' section. The table header has columns for 'Role Id', 'Screen Type', and 'Permission Type'. The table body is empty, displaying 'No Rows To Show'. At the bottom right of the table, there is a pagination control showing '0 to 0 of 0' and 'Page 0 of 0'. In the top right corner of the interface, there are three icons: a user icon, a delete icon (highlighted with a red box), and a refresh icon.

Update Role Rights:

- Here, the update process is different. If you want to change the Rights data , you need to enter the existing data again, and it will be automatically updated.

The screenshot shows the 'Role Rights' management interface. At the top, there are three input fields: 'Role Id', 'Screen Type', and 'Permission Type', each followed by a search icon. Add Attribute Detail:

- This section allows you to enter the specific items that will appear in the dropdown menus under each header category.

- For example, if you have set up a **"Country"** header, you can use the Detail screen to enter all the countries you want to list in the dropdown, such as **"United States," "Canada," "India,"** etc.
- Similarly, you can add entries for statuses, cities, states, categories, screen types, and more.
- After entering the details, click the **"Save"** button to add them to the system.
- These details will then be visible in dropdown menus throughout the system, depending on the header you've associated them with.
- The + button is used to add attribute header.

Add Attribute Header :

- In the Detail screen, there is an **"Add Header"** button. Clicking this button will navigate you to the **"Add Attribute Header"** screen.
- This section enables you to define the main categories for which dropdown options will be created. For example, you can set up a dropdown for countries by entering a header like **"Country"** and assigning a unique code.
- After entering the header information, click the **"Save"** button to store the header in the system.
- Once saved, the header will appear in the grid, and the associated dropdown options can be defined in the Detail screen.

Delete Attributes :

- To delete select the specific row and click the **"Delete"** button.
- A prompt will ask, **"Are you sure you want to delete this row?"**
- If you click **"Yes,"** the selected header or detail will be successfully deleted.
- A notification will appear saying **"Row deleted successfully."**
- If the attribute is linked to another record or is required for system integrity, it cannot be deleted, and a notification will appear stating, **"Attribute cannot be deleted due to a link with another record."**

The screenshot shows the 'Attribute' management page. At the top, there are search filters for Code, Sub Code, Detail Name, and Description. Below these is a 'Result Set' table with columns for Code, Sub Code, Detail Name, and Description. The table is currently empty, displaying 'No Rows To Show'. At the bottom of the page, there are fields for 'Created_by', 'modified_by', 'Created_date', and 'modified_date'. A red box highlights the 'Delete' button in the top right corner of the table area.

Update Attributes :

- If you need to update an existing attribute, modify the information and click the **"Update"** button.
- A prompt will ask, **"Are you sure you want to update the data in the selected rows?"**
- After clicking **"Yes"** the attribute will be successfully updated.
- A notification will appear saying **"Data updated successfully"**
- The old attribute configuration will be replaced by the new settings.

This screenshot is identical to the one above, showing the 'Attribute' management page with search filters, an empty 'Result Set' table, and update fields at the bottom. A red box highlights the 'Update' button in the top right corner of the table area.

Generate Report:

🔗 To generate a report on attribute configurations, click the "**Generate Report**" button to retrieve the information. This report will include details about headers and their associated dropdown options across the system.

Number Series

🔗 This screen allows you to define the number series for various screen types in the system. You can specify the start year, end year, and the range of numbers for each screen type. The starting number is always set to 1, and you must provide the ending number. The system will automatically **increment the running number** each time data is entered.

Screen Type	Start Year	End Year	Start No	Running No	End No
journal_no	01/04/2024	31/03/2025	1	2	10000
purchase_no	01/04/2024	31/03/2025	1	172	10000
purchase_return_no	01/04/2024	31/03/2025	1	64	10000
sales_no	01/04/2024	31/03/2025	1	138	10000
sales_return_no	01/04/2024	31/03/2025	1	65	10000
stock_transfer_no	01/04/2024	31/03/2025	1	147	10000

Define Number Series :

- 🔗 To define a number series, select the screen type for which you want to set up the series.
- 🔗 Enter the start year and end year for the number series.
- 🔗 The starting number is always 1; you need to specify the ending number.
- 🔗 The system will automatically manage and increment the running number each time you enter data in the relevant screen.

Add Number Series :

- 🔗 In Order to move to the add Number series screen click on add button in top right corner.

Screen Type	Start Year	End Year	Start No	Running No	End No	Text
delivery_challa_no	01/04/2024	31/03/2025	1	85	10000	SMHF

➊ After entering the required details, click the **"Save"** button to add the number series configuration.

➋ The number series configuration will appear in the grid.

Update Number Series :

➊ To update an existing number series configuration, modify the details as needed and click the **"Update"** button.

➋ A prompt will ask, **"Are you sure you want to update the data in the selected rows?"**

➌ After clicking **"Yes"** the number series will be successfully updated.

➍ A notification will appear saying **"Data updated successfully"**

➎ The old number series configuration will be replaced by the new settings.

Screen Type	Start Year	End Year	Start No	Running No	End No	Text
delivery_challa_no	01/04/2024	31/03/2025	1	85	10000	SMHF

Delete Number Series:

➊ To delete a number series configuration, select the specific row and click the **"Delete"** button.

➋ A prompt will ask, **"Are you sure you want to delete this row?"**

- If you click "Yes" the number series will be successfully deleted.
- A notification will appear saying "Row deleted successfully."
- If the number series is linked to another record or is required for system integrity, it cannot be deleted, and a notification will appear stating, "Number series cannot be deleted due to a link with another record."

Delete Item :

- To delete an item, select the specific row and click the **"Delete"** button.
- A prompt will ask, **"Are you sure you want to delete this row?"**
- If you click **"Yes"** the item will be successfully deleted.
- A notification will appear saying **"Row deleted successfully"**
- If the item is linked to other records or required for system integrity, it cannot be deleted, and a notification will appear stating, **"Item cannot be deleted due to a link with another record"**

Generate Report :

- To generate a report on item configurations, click the **"Generate Report"** button to retrieve the information.

Warehouse

- After clicking **"Warehouse"** from the sidebar, the Warehouse Management screen will appear. This section allows you to manage warehouse details, including their locations and other relevant information.
- You can search for existing warehouse details using the provided search criteria. Enter valid data to display the results in a grid.

• If no matching warehouses are found, a notification will appear stating "**Data not found**" You can refresh the screen to search again.

• To display all existing warehouse details, simply click the "**Search**" button without entering any data, and all records will be shown.

Add Warehouse :

• To add a new warehouse, enter the relevant details including:

- ✦ **Warehouse Name:** Enter the name of the warehouse.
- ✦ **Location:** Specify the physical location of the warehouse.
- ✦ **Additional Details:** Include any other relevant information such as warehouse capacity, contact details, etc.

• After entering the details, click the "**Save**" button to add the warehouse.

• You can close the window using the "**Close**" button or navigate back using the "**Back**" button.

• After saving, the warehouse details will appear in the grid.

Update Warehouse :

- To update an existing warehouse, modify the details such as name, location, or other relevant information, and click the **"Update"** button.
- A prompt will ask, **"Are you sure you want to update the data in the selected rows?"**
- After clicking **"Yes"** the warehouse details will be successfully updated.
- A notification will appear saying **"Data updated successfully."**
- The old warehouse details will be replaced by the new information.

The screenshot displays the 'Warehouse' management interface. At the top, there's a header with 'YJK TECHNOLOGIES PRIVATE LIMITED Chennai' and a user greeting 'Welcome, JK'. Below the header, the 'Warehouse' section contains four input fields: 'Warehouse Code', 'Warehouse Name', 'Status' (with a dropdown arrow), and 'Location No'. There are search and refresh buttons below these fields. A 'Result Set' table is shown below, with columns for 'Warehouse Code', 'Warehouse Name', 'Status', and 'Location No'. The table is currently empty, displaying 'No Rows To Show'.

Delete Warehouse :

- To delete a warehouse, select the specific row and click the **"Delete"** button.
- A prompt will ask, **"Are you sure you want to delete this row?"**
- If you click **"Yes"** the warehouse will be successfully deleted.

- A notification will appear saying **"Row deleted successfully."**

- If the warehouse is linked to other records or is required for system integrity, it cannot be deleted, and a notification will appear stating, **"Warehouse cannot be deleted due to a link with another record."**

Generate Report:

- To generate a report on warehouse details, click the **"Generate Report"** button to retrieve the information.

Vendor

- After clicking **"Vendor"** from the sidebar, the Vendor Management screen will appear. This section allows you to manage vendor details, including contact numbers and addresses.

- You can search for existing vendor details using the provided search criteria. Enter valid data to display the results in a grid.

- If no matching vendors are found, a notification will appear stating **"Data not found."** You can refresh the screen to search again.

- To display all existing vendor details, simply click the **"Search"** button without entering any data, and all records will be shown.

Generate Report:

- To generate a report on vendor details, click the "**Generate Report**" button to retrieve the information.

Customer

- After clicking "Customer" from the sidebar, the Customer Management screen will appear. This section allows you to manage customer details, including contact numbers and addresses.
- You can search for existing customer details using the provided search criteria. Enter valid data to display the results in a grid.
- If no matching customers are found, a notification will appear stating "**Data not found.**" You can refresh the screen to search again.
- To display all existing customer details, simply click the "**Search**" button without entering any data, and all records will be shown.

The screenshot shows the 'Customer' management interface. On the left is a sidebar with navigation options. The main area has a 'Search Criteria' section with input fields for Code, Name, Pin No, GST No, Address, City, State, and Country. Below this is a 'Result Set' table displaying customer records.

Code	Name	Company Code	Address1	Address2	Address3	Address4

Add Customer Header :

- In the Detail screen, there is an "**Add Header**" button. Clicking this button will navigate you to the "**Add Customer Header**" screen.
- This section allows you to define the main categories for customers. Enter the customer name and assign any relevant codes if needed.
- After entering the header information, click the "**Save**" button to store the customer header in the system.
- Once saved, the customer header will appear in the grid, and the associated customer details can be defined separately.

Add Customer Detail :

➊ After setting up the customer header, navigate to the **"Add Customer Detail"** screen to enter specific details related to each customer.

➋ To add a new customer, enter the relevant details including:

✦ **Customer Name:** Enter the name of the customer.

✦ **Contact Number:** Provide the contact phone number of the customer.

✦ **Address:** Specify the complete address of the customer.

✦ **Additional Details:** Include any other relevant information such as email address, website, or notes.

➌ After entering the details, click the **"Save"** button to add the customer.

➍ You can close the window using the **"Close"** button or navigate back using the **"Back"** button.

➎ After saving, the customer details will appear in the grid

Update Customer :

- To update an existing customer, modify the details such as contact number, address, or other relevant information, and click the **"Update"** button.
- A prompt will ask, **"Are you sure you want to update the data in the selected rows?"**
- After clicking **"Yes"** the customer details will be successfully updated.
- A notification will appear saying **"Data updated successfully."**
- The old customer details will be replaced by the new information.

Accounting Center

Description :

The **Accounting Center Screen** is designed to calculate the items provided for service and maintenance purposes. It helps users track and manage expenses related to these items efficiently.

The screen presents a clear overview of financial data, allowing for better budgeting and resource allocation. Overall, it streamlines the accounting process for service-related items.

Department

Description :

A **department** is a distinct division within an organization that focuses on specific functions or areas of expertise. Each department typically has its own set of responsibilities, staff, and goals, contributing to the overall objectives of the organization. Common examples include departments such as Finance, Marketing, and Sales. By organizing tasks into departments, businesses can enhance efficiency and streamline operations.

🔍 The **department Screen** enables users to conveniently view and manage their employee data.

🔍 It also includes various search filters to help users find and view their Department data more easily and a refresh button to refresh the page.

🔍 After searching for the Department data, it will display the results as shown in the reference image provided below.

The screenshot shows a web application interface titled "Department". It features two search input fields: "Department Code" and "Department Name". To the right of these fields are two buttons: a magnifying glass icon for search and a circular arrow icon for refresh. Below the search fields, a "Result Set" table is displayed. The table has two columns: "Department Code" and "Department Name". A single row is visible with the code "BCA" and the name "Bachelor of Computer Application". At the bottom right of the table, there is a pagination indicator showing "1 to 1 of 1" and navigation arrows.

This screen includes **Add**, **Delete**, **Update**, and **Print** buttons for various functionalities:

- ✦ **Delete button** – Used to remove specific user Department data.
- ✦ **Update button** – Allows updating Department details to reflect any changes.
- ✦ **Print button** – Used to print the selected Department data for record-keeping or reference.

Reference image as mentioned below.

✦ **Save button** – Allows the user to save their data after entering it in the form.

License

Description:

The **license** is used to grant permission for items that have been issued to employees. It serves as an official document that allows employees to utilize specific resources or equipment for their tasks. This system ensures that all items are tracked and accounted for, promoting responsible use. By managing licenses effectively, organizations can enhance accountability and maintain control over valuable assets. Overall, it helps ensure that employees have the necessary authorization to use the provided items.

Accessory

Description:

An **accessory** refers to supplementary items that enhance the functionality or usability of primary devices or equipment. For example, a laptop keyboard, external hard drive, or a mouse are

considered accessories that improve the overall user experience. These items often provide additional features or capabilities, making tasks easier and more efficient. Accessories can include various tech-related components, such as chargers, stands, or protective cases. Overall, accessories play a significant role in optimizing the performance and versatility of primary devices.

Consumable

Description:

Consumables refer to items that are used up or depleted during the operation of electronic devices, particularly in computing environments. Examples include laptop keyboards, and mouse pads, which are essential for maintaining device functionality. These items are typically replaced after a certain period or usage, contributing to the overall performance of the equipment. Consumables are crucial for ensuring smooth operation and can directly affect productivity in a tech-driven workspace. Overall, they play an important role in supporting the functionality and usability of electronic systems.

Components

Description:

A **component** refers to an individual part or element that makes up a larger system, particularly in the context of laptops and computers. Common components include the motherboard, CPU, RAM, storage drives, and graphics cards, each playing a vital role in the overall functionality of the device. These components work together to process data, store information, and manage tasks efficiently. Upgrading or replacing specific components can significantly enhance a laptop's performance and capabilities. Overall, understanding these components is essential for troubleshooting, maintenance, and optimization of laptop systems.

Transactions

Purchase :

- After clicking "Purchase" from the sidebar, this screen will appear.
- You can search for existing purchase transactions using the **transaction number**. If valid data is entered, the results will be displayed in a grid.
- The **transaction number** is a running number generated from the number series. If you click the "Search" button, it will display previously entered purchase returns, allowing you to view or delete existing purchase data.
- If you search for a transaction that doesn't exist, a notification will appear stating "**Data not found**." You can refresh the screen to search again.

Tooltips and Buttons:

🔗 In the corner, you'll find four buttons with tooltips that explain their functions.

- ✦ Save
- ✦ Delete
- ✦ Print
- ✦ Refresh

Add Purchase:

🔗 Here, you can add a new purchase transaction with detailed information.

✦ **Transaction Date:** Enter the date of the purchase transaction.

✦ **Vendor Code:** Input the vendor code. Once you enter the vendor code

✦ **Vendor Name** will automatically populate based on the stored data. Also you can use vendor help

Adding a Purchase Return:

🔗 **Enter Return Details:** After selecting the relevant purchase data, enter the following return details:

✦ **Return Date:** The date on which the return is being processed.

✦ **Return Number:** A unique identifier for the return transaction.

✦ **Return Person:** The individual responsible for handling the return.

✦ **Return Reason:** The reason for the return.

🔗 **Enter Return Quantity:** In the grid, specify the quantity of items being returned. This quantity will be deducted from the original purchase quantity.

🔹 **Save Return:** After entering all required details, click the **"Save"** button to process the return. The system will automatically update the purchase data, subtracting the returned quantity from the original purchase record.

🔹 **Notification:** Upon successful saving, a notification will appear stating **"Purchase return data inserted successfully"**

Generating a Purchase Return Report:

🔹 **Report Generation:** To generate a report on purchase returns, click the **"Generate Report"** button.

Sales:

🔹 After clicking **"Sales"** from the sidebar, this screen will appear.

🔹 You can search for existing sales bills using the **Reference** number. If valid data is entered, the results will be displayed in a grid.

• The bill number is a running number generated from the number series. If you click the "Search" button, it will display previously entered sales bills, allowing you to view or delete existing sales data.

• If you search for a bill that doesn't exist, a notification will appear stating "Data not found" You can refresh the screen to search again.

Add Sales Bill:

• Here, you can add a new sales bill with detailed information.

• **Customer Code:** Input the customer code. Once you enter the customer code, the Customer Name will automatically populate based on the stored data. You can also use customer help to search for the customer.

Sales Return:

This section allows you to manage and process returns for sold items within the system. It is designed to help you efficiently enter return information, ensuring that sales records are accurately

updated. Below is an overview of the features and functionality available in the Sales Return module:

Searching Sales Data:

- **Retrieve Sales Data:** To process a return, first, search for the relevant sales data. This can be done by entering the **Sales Reference Number** or other **search criteria**.
- **Display Results:** Once valid data is entered; the corresponding sales details will be displayed on the screen. If no matching data is found, a notification will appear stating "**Data not found.**" You can refresh the screen to search again.
- **View All Data:** To view all existing sales records, simply click the "**Search**" button without entering any search criteria, and all records will be displayed.

Adding a Sales Return:

- **Enter Return Details:** After selecting the relevant sales data, enter the following return details:
 - ✦ **Return Date:** The date on which the return is being processed.
 - ✦ **Return Number:** A unique identifier for the return transaction.
 - ✦ **Return Person:** The individual responsible for handling the return.
 - ✦ **Return Reason:** The reason for the return.
- **Enter Return Quantity:** In the grid, specify the quantity of items being returned.
 - This quantity will be deducted from the original sales quantity.
- **Save Return:** After entering all required details, click the "Save" button to process the return.

🔹 The system will automatically update the sales data, subtracting the returned quantity from the original sales record.

🔹 **Notification:** Upon successful saving, a notification will appear stating

🔹 "Sales return data inserted successfully."

- The picture above shows the fields where the user can enter Return Data.

- The **magnifying glass button** is used to open a popup that displays the saved data after it has been stored.

The screenshot shows the 'Inventory Return' form. At the top, there are four search filters: Transaction ID* (SMHF/10/2024-2025), Transaction Date* (20-09-2024), Transaction Type* (Sales), and Default Warehouse (MIN2). Below these filters is a table titled 'Item Details'. The table has columns: S.No, Item Code, Item Name, Warehouse, Supplier, Serial No, Qty, Reason, and Processed By. The first row of data shows S.No: 1, Item Code: DDF, Item Name: dhans D, Warehouse: MIN2, Supplier: ki, Serial No: 2, Qty: non, and Processed By: vj. There are also buttons for search, refresh, and save.

The Popup Contains three buttons

- The **Search** feature allows users to find saved data by entering criteria into the search filters.
- By clicking the search icon button, the relevant saved data will be displayed in the grid.
- The Refresh button is used to refresh the grid.
- The final tick button is used to view the selected data in the screen After selecting your data.

This is another screenshot of the 'Inventory Return' form, identical to the one above. It shows the same search filters and the 'Item Details' table with one row of data.

- The + and _ button is used to add the the default row and to delete the default row .
- After Entering the data the user can save the data by clicking the save button

This is a third screenshot of the 'Inventory Return' form, identical to the previous ones. It shows the same search filters and the 'Item Details' table with one row of data.

- It also includes an **Update** button that allows users to modify the saved data.
- The **Delete** button is used to remove any saved data.

- The **Print** button enables users to print specific data as needed.

Assets Allocation ×

- The **Delete** button is used to remove any saved data.

Assets :

Description:

- Assets Allocation screen is designed to store and manage the detailed information about all items that have been allocated such as equipment or devices It tracks Allocation history helping to monitor item usage and assignments.

Request_Allocation:

Description:

- The request allocation screen allows employees to submit requests for specific equipment or resources they need, such as systems, laptops, or monitors. Through this screen, employees can apply for any necessary items required for their work. The system tracks these requests, ensuring proper approval and allocation. It simplifies the process of managing employee equipment needs efficiently.

File Import & Export

Description:

- The file import screen is designed to import Excel files and display the data on the screen for easy viewing. Additionally, it allows users to export the entered and saved data back to an Excel sheet. This functionality streamlines data management by facilitating both import and export processes. Users can efficiently handle their data using this versatile screen

Serial Number Generation :

Description:

- The serial number generation screen is used to create unique serial numbers based on the allocation for employees. It ensures that each item assigned has a distinct identifier, streamlining tracking and management. This process helps maintain organization within the asset allocation system. Users can easily generate serial numbers for efficient record-keeping

Report

Assets:

Description:

- The assets report screen is used to calculate and display the total assets allocated to each employee. This screen provides a comprehensive overview of all allocated items, including details such as item type, quantity, and allocation dates. Users can easily review and analyze the distribution of assets within the organization. It helps in tracking asset usage and ensuring accountability among employees."

Accessories:

Description:

• The accessory report screen provides an overall view of the accessories that have been updated or serviced, such as laptop keyboards and other peripherals. This screen allows users to track the status and maintenance history of each accessory, ensuring they are in good working condition. It helps in managing the lifecycle of accessories efficiently. Users can quickly identify any items that require attention or replacement

Employee Asset Assignment Report:

Description:

• The employee assets assignment report screen offers a comprehensive overview of all assets assigned to employees. It displays detailed information about each asset, including allocation dates, item descriptions, and employee names. This screen facilitates tracking and management of asset assignments within the organization. Users can easily monitor which assets are assigned to whom, ensuring effective oversight and accountability

Accounting centre Allocation Report:

Description:

• The accounting centre allocation report provides a comprehensive overview of accounting allocations made to employees. It includes detailed data from start to finish, covering aspects such as allocation dates, assigned responsibilities, and financial details. This report helps in tracking the distribution of accounting resources effectively. Users can gain insights into how allocations are utilized and managed within the organization.

Location based Asset Report :

Description:

• The location-based asset report screen provides an overview of all asset data allocated to different locations within the organization. It displays information about assets assigned to various branches, including relevant details for each employee. Additionally, it calculates item data and quantities, offering insights into the distribution of resources. This screen helps users track asset allocation effectively, enhancing visibility and management across all locations

Historical Assets Change :

Description:

- The historical assets change report screen provides a comprehensive overview of both minor and major changes made to assets allocated to employees. It tracks the history of asset modifications, ensuring that all adjustments are documented for accountability. Additionally, the screen calculates and monitors upcoming changes, offering insights into future asset management needs. This functionality helps organizations maintain an accurate and updated record of asset allocations

Software License:

Description:

- The software license screen is used to view comprehensive data about software licenses and their users within the organization. It provides details on who is using each specific software, ensuring compliance with licensing agreements. This screen monitors and saves relevant information, such as license expiration dates and usage statistics. It helps organizations manage their software assets effectively and maintain proper oversight of licensing requirements.

Asset categories:

Description:

- The assets categories screen is used to generate an overall report of assets that have been categorized, detailing which items are assigned to whom and how they are classified. This screen provides insights into the categorization of assets, allowing users to track and manage them effectively. It helps in understanding the distribution and organization of resources within the organization. By presenting this information clearly, the screen aids in efficient asset management and decision-making

Consumables:

Description:

- The consumables report screen provides an overall view of item data for consumables that have been replaced after a certain period. It tracks information regarding the types of items replaced, their usage history, and the reasons for their replacement. This monitoring helps organizations maintain adequate supplies and ensure that essential items are always available for optimal device performance.

Components:

Description:

- The component report screen provides an overview of all components that have been replaced, detailing the quantity and specific reasons for each replacement. For example, if a keyboard in a system malfunctions, this screen tracks the replacement process and rationale behind it. This functionality ensures that organizations can monitor the performance and reliability of their components effectively. By maintaining this data, businesses can enhance their maintenance strategies and improve system functionality.
